Stoutland R-II School District

May 2023 Newsletter

Roof Update

This spring the district's roof project began and the contractors have made great progress thus far. As you might recall, the Stoutland R-II Board of Education unanimously approved the approximately \$1.8 million dollar project at their September 2022 board meeting. Over half of the project is being financed through federal funds. The remainder is being funded through the strong balances the district has built over the recent years thanks to the good financial stewardship of the board of education and district administration. This investment will be completed without an increase in taxes, without requesting the passage of a bond issue and without borrowing funds. Several areas on the newer areas of the building have received a new roof coating and are complete. The contractor has already begun re-roofing other areas of the facility and work is progressing very well. Unfortunately, the gym area did experience a significant leak during the storms that occurred on April 15th. The gym floor was impacted and we are currently researching the best course of action moving forward. The district is committed to providing a quality learning environment for its students. This major project will assist in providing our students with this environment.

New Elementary Playground

With the help of federal funds towards Social Emotional Learning and a donation from PTSO we are able to replace a large piece of our playground equipment and swings. Construction will be begin at the end of June and is planned to be complete by the first day of the 2023-2024 school year. Below is a drawing of the new pieces of equipment.
